## WORK EXPERIENCE

### Patient Access Specialist

(Feb 2021 - Current)

### Senior Patient Access Representative

(Nov 2020 - Feb 2021)

### Patient Access Representative

(Aug 2018 - Nov 2020)

#### University Of Miami

📅 Aug 2018 - current 📍 Miami, FL

- Systematized patient demographic and insurance data into database to establish patient medical records and perform diverse data entry
- Led and trained new staff on hospital processes and procedures
- Conducted patient pre-admission, admission, transfer, and discharge operations
- Catalogued data, generated reports, created financial estimates, and registered user accounts

## PROJECTS

### NBA betHub

- Used HTML, CSS, JS, Rapid's Basketball + Giphy API to create a web app that shows real time daily NBA scores and allows you to place quick bets.
- A live scoreboard of all daily NBA games and random NBA basketball related gifs populate on screen, as well as direct links to NBA basketball odds on several popular betting websites at the bottom of the page.

### Fav Savs

- Used HTML, CSS, and Handlebars for Front End Design, MySQL for Database management, Sequelize for ORM Front-End/Back-End connection.
- Web application used to store and callback topics which you want to explore at a later date.

### Cliffhanger

- Used HTML, CSS, React, MUI for Front-End Design, MongoDB to host Database, BCrypt to hash user credentials, Heroku to launch application
- Create/continue stories through collaborative storytelling - Create, Read, Update or Delete story entries with other users
